

LICENSE AGREEMENT
and
FEE POLICY
ADA COUNTY DRAINAGE DISTRICT NO. 3
Amended August 2024

NOTICE IS HEREBY GIVEN that Drainage District No. 3 of Ada County, Idaho (the “District”), by and through its Board of Commissioners, does hereby establish and fix the following license agreement and fee requirements for the District’s review, agreement drafting, and approval of certain proposed projects, as further described herein, and as may arise within the District’s jurisdictional boundaries.

(1) Pursuant to Idaho Code § 42-2939, the District shall have all powers necessary to contract for the performance and payment of any or all work necessary to implement the drainage services of the District.

(2) The District hereby establishes a policy and procedure required of all contractors, entities, agencies, and individuals seeking temporary access to, or across, the District’s drainage easement for various purposes as may be allowed by the District from time to time.

(3) Such person or entity (“Applicant”) requesting access to the District’s drainage easement shall provide a description of the project, or purpose for requesting such access, as well as a legal description or general depiction of the area and the District’s related drainage easement.

(4) If the District, in its sole discretion, determines that the project or access will require a license agreement, the Applicant shall request a license agreement from the District, granting temporary access to the District’s drainage easement.

(5) Such license agreement shall be subject to a license fee of \$2,500 which shall be paid to the District upon request for such license agreement and shall cover the District’s costs of engineering review and legal drafting of the license agreement.

(6) The license agreement shall be approved by the Board of Commissioners of the District and shall not be recorded with the county recorder’s office. The license agreement shall provide temporary access only.

(7) Nothing herein prohibits the District from implementing an additional fee which exceeds the standard \$2,500 license fee should the nature of the project or purpose necessitate additional compensation to the District as it relates to its drainage facility and easement.
